◎ From the beginning of FY2021, Accounting Standard for Revenue Recognition and other standards are applied.

Net sales :

 Regarding the semiconductor industry, demand increased greatly for PCs, servers and a wide range of fields, on the back of the rapid advance of digitalization of society and economy. Moreover, due to emergence of tight demand and supply of semiconductors in the automobile and other markets, vigorous demand conditions continued.
Net sales increased greatly 48% year on year as the sales of flip-chip type packages, leadframes, ceramic electrostatic chucks and other products increased

significantly.

Profit :

 Profit increased significantly year on year by increased profitability thanks to the expansion of net sales of each product on the back of buoyant demand and continuation of yen depreciation trend in the exchange rate.

Net sales and each profit reached record highs.

Reasons for the revision (Summary)

- Regarding the semiconductor industry, demand continued to expand, on the back of the rapid advance of digitalization of society and economy.
- In the third quarter, demand for flip-chip type packages for PCs and servers exceeded the forecast, and orders for leadframes for automobiles and other applications further increased. Revenue especially has overtaken our expectations due to the increase in sales contributed to profitability, and increased productivity and others, in addition to the exchange rate remained at the yen depreciation against our assumption.
- With these situations, we revised the forecast of FY2021 released on October 26, 2021.
- We have revised the exchange rate of FY2021 fourth-quarter which is the prerequisites for the forecast of FY2021 from 108yen per dollar to 110yen per dollar.
