

Greenhouse Gas Emissions Reduction Targets Validated by the SBTi

NAGANO, Japan, October 19, 2026 – SHINKO ELECTRIC INDUSTRIES CO., LTD. hereby announces that the greenhouse gas (GHG) emissions reduction targets of the Shinko Group, with fiscal year 2030 as the target year, have been validated by the Science Based Targets initiative (SBTi)*¹ as science-based targets aligned with the level of ambition required by the Paris Agreement.

GHG Emissions Reduction Targets Validated by the SBTi

Target Scope	Base Year	Reduction Targets
Scope 1 + 2* ²	FY2020	56% reduction by FY2030
Scope 3 (Categories 1 and 10) * ³		25% reduction by FY2030

The Shinko Group is engaged in a variety of activities to fulfill the responsibility of a manufacturing company to reduce environmental impact. Among these, the greatest priority is given to responding to climate change, based on our understanding that it is essential for realizing a sustainable society, and related activities are conducted throughout the Group.

Against the backdrop of international frameworks such as the Paris Agreement, strengthening global regulations, and the expanded application of carbon taxes, the trend toward decarbonization is accelerating further in countries around the world. Under these circumstances, the Shinko Group has been addressing climate change by clarifying its goals through its “Environmental Policy” and “Environmental Vision 2050” and by setting medium- to long-term targets. The Shinko Group will further strengthen its initiatives to achieve carbon neutrality as soon as possible and contribute to the realization of a decarbonized society.

*1 Science Based Targets initiative (SBTi) is an international initiative established by CDP, the United Nations Global Compact (UNGC), the World Resources Institute (WRI), and the World Wide Fund for Nature (WWF) to evaluate corporate GHG emissions reduction targets.

*2 Scope 1: Direct GHG emissions from sources owned or controlled by a company

Scope 2: Indirect GHG emissions associated with the consumption of purchased electricity, heat, etc.

*3 Scope 3: GHG emissions throughout the supply chain excluding Scope 1 and Scope 2

Category 1: Purchased goods and services

Category 10: Processing of sold products
